- Sensors can be used again on other products
- 3 year battery life in stand-by mode
- Self-contained alarm
- Available in two ends. Loop or sensor

With the **Self-Alert**, securing your merchandise is as easy as one, two three!

Simple and effective, the Self-Alert is ideal for securing items such as collectible's, figurines and portable devices.

The unit is armed by sliding the switch underneath the unit to the "ON" position prior to installation.

If an alarm situation occurs, simply

reset the unit by sliding the power switch, located on the underside of the rectangular sensor, back to its "OFF" position.

A cost-effective solution, the sensors can be used over and over again.

This gives you the ability to move merchandise quickly as you sell one item and replace it with another that can be secured right away.

INFOBYTE

Self Alert with oval sensor end

The rectangular and oval sensor ends are easily attached to most surfaces using double-sided tape.

INFOBYTE

Self Alert with loop end

For installation, simply insert the loop end of the Self Alert through any "handle-like" area on the item. Feed the rectangular sensor through the loop end of the alarm and then attach to any stationary surface.
